

AI ADOPTION IN TECHNICAL WRITING

# Document Intelligence Platform

Draft Generator & Automated Pre-Review

11-Member Team | Skill-Based Drafting | MCP-Based Review Framework

# Project at a glance

CHARTER SUMMARY

## THE PROBLEM

Writers spend significant time converting scattered source content into documentation and running repetitive pre-review checks — style, formatting, terminology, readability — creating review bottlenecks and multiple revision cycles.

## THE SOLUTION

An AI tool that turns a single source file — in any supported format — into a structured first-pass draft, then auto-reviews it against the team's shared documentation rules before it reaches formal review.

~50%

faster first-pass drafts

~50%

fewer manual review cycles

01 / 11

# Shrutika

INPUT **Demo Transcripts**

Converts product demo transcripts into structured walkthroughs and step-by-step task documentation ready for human review.

## CHALLENGES

- Noisy, verbose transcripts with filler and tangents
- Extracting ordered steps from spoken narration
- Mapping on-screen UI actions to written instructions

## PROJECT RESOURCES

- **Input:** Transcripts in .vtt format
- **Output:** HTML page with the structure walkthrough content
- **GitHub Repo Branch:** [Content Drafts from Demo Transcripts](#)

**METRICS - MANUAL VS AI (estimated-for an XS size transcript, not measured)**

- **Total active human time:** Manual ~75 to 170 min **vs** AI ~10-12 min

## Documentation Automation Pipeline

Raw demo transcript to publication-ready HTML  
four skills, zero manual formatting

Raw Transcript (.vtt)

### 1 transcript-normalizer-custom

Strips timestamps, filler words, false starts, and side conversations from the raw VTT transcript

Output: Structured JSON (goals, prereqs, tasks)

### 2 documentation-author-custom

Writes a task-oriented Markdown guide: intro, prerequisites, numbered steps, expected outcomes

Output: Draft Markdown guide

### 3 documentation-reviewer-custom

Scores the draft against 8 writing standards — clarity, accessibility, Microsoft style compliance

Output: QA score 89.5 / 100, 0 critical issues

### 4 documentation-finalizer-custom

Renders the reviewed Markdown into a clean, single-column, publication-ready HTML page

Output: Published HTML guide

Publication-Ready HTML Guide

Same pipeline, reusable for every future demo transcript
